CREATING THE NEXT<sup>®</sup>

# THE CAREER CENTER

The **Georgia Tech Career Center** provides quality career education for every student. Our model encompasses three crucial components:

- 1. Career Preparation** includes career exploration, programming, advising, and securing a career path
- 2. Career Experience** manifests primarily as co-op, internships, and related experiential education
- 3. Career Connections** are facilitated through career fairs, interviews, networking events, and related programs

Our team partners across campus, and around the globe, with students, employers, faculty, and alumni to support students' career aspirations. **Core programs & services:**

## » Co-op

An accredited academic program that alternates between full-time study and full-time paid work experience. By working with the same employer for multiple semesters, co-op students gain valuable professional experience in their major. **career.gatech.edu/co-op**

## » CareerBuzz

Our career management portal to make appointments, see scheduled events, and find job opportunities. It's your one-stop shop for internship, co-op, or job search. **career.gatech.edu/careerbuzz**

- » To learn more about the Career Center, visit **career.gatech.edu** or email us at **careercenter@gatech.edu**.

## » Internship

Internships are designed to complement a student's formal education with practical experience. They are single-semester, major-related work experiences. **career.gatech.edu/internships**

## » Full-Time Employment Acquisition

Our ultimate goal is for you to succeed professionally by helping you package yourself, target prospective employers, obtain your first job, and navigate your career successfully.
